3 March 1965

MEMORANDUM FOR: Chief, Logistics Branch, Support Staff, NPIC
FROM : Chief, Photographic Intelligence Division, CIA
SUBJECT : High Power Stereo Head for Chip Comparator

1. The prototype [REDACTED] Chip Comparator has been in this Division for several months. During this time it has been extensively evaluated by both the Plans and Development Staff and by Photographic Intelligence Division personnel. Through these evaluations it has been determined that the stereo head as presently configured is not adequate.

25X1A

2. Working with the [REDACTED] Plans and Development Staff has developed a stereo head assembly which it is believed will overcome the deficiencies in the present model. A proposal has been received from the [REDACTED] to produce this new stereo head assembly for the production models of the Chip Comparator which are on order and action is being taken by P&DS to authorize this production.

3. The Plans and Development Staff has recommended that the Photographic Intelligence Division take steps for retrofitting the prototype chip comparator in order to take advantage of this new development. We concur in this recommendation and are attaching requisition number 5500-3201-65 for the new stereo head assembly. It is requested that this requisition be approved and forwarded.
